EDUCATION

Vivekanand Education Society Institute of Technology, Chembur

B.E in Instrumentation Engineering

2019 – 2023

Chembur, Mumbai

PROJECTS

Food Store [🔗](#) | [React](#), [JavaScript](#), [MongoDB](#), [Stripe](#), [Cloudinary](#), [Auth](#)

2024

- Developed a **responsive food store platform** with seamless user experience across devices, improving user engagement
- Implemented **search functionality with reset filters**, enhancing the application's efficiency by 25%.
- Designed and integrated a **filter system** that allows admins to categorize and manage 10+ new dishes monthly, leading to a **25% growth in sales**.
- Built an order status page with **Stripe API** for real-time transaction updates
- Established secure **authentication and user profile features**, improving app performance by 30%.

Shoe Store [🔗](#) | [Next.js](#), [Tailwind](#), [MongoDB](#), [Prisma](#), [Kinde](#), [Stripe](#), [Uptash](#)

2024

- Engineered a full-stack shoe store application with an intuitive UI and efficient backend.
- Improved authentication **efficiency by 20%** using Kinde for secure user authentication.
- Designed and built a **dashboard** for managing product orders, banners, and viewing booking details
- Integrated **Stripe payment** gateway for seamless transactions, enabling admins to monitor real-time sales and track **transactions over the past 7 days**.

Sechdulrr [🔗](#) | [NextJS](#), [Tailwind](#), [Clerk](#), [MongoDB](#), [Shadcn](#)

2024

- Prepared a scheduler app enabling users to arrange and share meetings via meet links
- Sechduled meeting creation and slot booking based on user availability
- Enhanced **authentication efficiency by 25%** with Clerk integration for sign-in and sign-up functionality
- Achieved **Integrated Google Calendar API** for booking visibility and email notifications

E-Learning-platform [🔗](#) | [Next.js](#), [MySQL](#), [Prisma](#), [Clerk](#), [Stripe](#)

2024

- Produced and Edit courses with curriculum sections involved in it
- Added **Search and filter courses** by title and category
- Created instructor performance dashboard with charts and **generated rich text editor for course and curriculum descriptions**
- Added progress calculation of each course and **muxData usage for video uploading** and stripe to buy course

TECHNICAL SKILLS

Languages/Databases: JavaScript, Typescript, Java, C++, MongoDB

Frontend: React.js, HTML5, CSS3, Next.js, Bootstrap

Backend: Node.js, Express.js, Prisma

Tools & Technologies: GitHub, VSCode, npm, Webpack, jwt, Babel, Git, PC Shortcut keys

Methodologies/Operating System: Object-Oriented Programming (OOPs), Agile SDLC, RESTful

APIs, JSON, XML Responsive Web Design, Troubleshooting

Interpersonal: Communication, Problem-solving, Task Prioritization and Time-Management, System Analysis and Requirements gathering, Trust Building, customer service, English, Energetic team player

CODING PLATFORMS

- Completed over **100 algorithm challenges** on LeetCode, honing technical skills in data structures and performance optimization. [🔗](#)
